Elmdale Group Environmental Policy

Elmdale Group is committed to leading the industry in minimising the impact of its activities on the environment.

The key points of its strategy to achieve this are:

- Minimise waste by evaluating operations and ensuring they are as efficient as possible.
- Minimise toxic emissions through the selection and use of its fleet and the source of its power requirement.
- Actively promote recycling both internally and amongst its customers and suppliers.
- The Company will implement training for its staff to raise awareness of environmental issues and enlist their support in improving the Company's performance.
- Source and promote a product range to minimise the environmental impact of both production and distribution.
- Meet or exceed all the environmental legislation that relates to the Company.
- Elmdale will encourage the adoption of similar principals by its suppliers.

In addition to this, Elmdale have implemented a used toner cartridge collection and recycling system that will allow a full audit trail and certification of recycling for these cartridges.

This will allow our customers that do not already have their own recycling procedures in place to subscribe to this service.

Our main supplier of equipment is Konica Minolta and they have their own environmental procedures and policies in place details of which can be found at:
